## EDUCATION

### University of Toronto

Expected 2026

*Honours in Bachelors of Science (H.Bsc.), Computer Science and Mathematics*

- Cumulative GPA: **3.84/4.0**
- Dean's List Scholar (2023, 2024, 2025)

**Relevant Coursework:** Algorithms, Databases, Systems Programming, Software Engineering, Information Security

## TECHNICAL SKILLS

**Languages:** Python, Java, C, C#, JavaScript, TypeScript, SQL, Bash, HTML/CSS

**Frameworks & Libraries:** React, Next.js, Node.js, Express, ASP.NET, JavaFX, JUnit, Selenium

**Technologies & Tools:** PostgreSQL, MongoDB, Docker, AWS Lambda, DynamoDB, Kubernetes, RESTful API Design

## EXPERIENCE

### Amazon Web Services

May. 2025 – Aug. 2025

*Software Development Engineer Intern*

*Vancouver, British Columbia*

- Designed and deployed a large-scale monitoring system tracking end-to-end S3 connectivity across **30+** AWS regions and networks, enabling proactive detection of failures before they **impacted millions of customers**
- Implemented a root cause detection algorithm separating customer-impacting outages from non-impacting patterns, enabling faster investigation and response, validated through gameday simulations and **real incidents**
- Built serverless workflows with **AWS Lambda, DynamoDB, API Gateway**, and **S3** caching, processing **400M+** metrics daily with sub-second query latency, cutting data collection from 5 minutes to **≤18s**
- Delivered a live incident dashboard that reduced operator response time by **90%** via automated traffic rerouting

### Acadia University

Jan. 2025 – Apr. 2025

*Software Developer*

*Wolfville, Nova Scotia*

- Developed a full-stack web app digitizing SMILE's participant and volunteer workflows, eliminating paper processes, saving staff **10+** hours of admin work weekly, and serving **700+** users each semester
- Built secure authentication and role-based access control with **NextAuth** and **Prisma**, safeguarding sensitive health data while enabling smooth onboarding and safe account management for families and volunteers
- Designed responsive dashboards and scheduling tools with **Next.js** and **Postgres**, using Prisma indexing and query optimizations for real-time tracking of attendance, goals, and program activities across devices
- Led API design with **OpenAPI** and **Jest** testing, deploying on Vercel/Supabase for scalable releases

### Ericsson

May. 2024 – Aug. 2024

*Integration Engineer Co-op*

*Toronto, Ontario*

- Built an SD-WAN orchestration tool automating network provisioning, cutting setup from **hours to minutes**
- Engineered an automation framework using **Python, Robot Framework**, and **Selenium**, eliminating repetitive network validations, saving **400+** hours, and improving reliability while accelerating integration cycles
- Dockerized and integrated with **GitLab CI/CD**, enabling async execution and **90%** automation coverage
- Deployed the framework with **Kubernetes**, scaling automated validations across environments

### Akhny Solutions Inc.

May. 2023 – Aug. 2023

*Software Engineer Intern*

*Toronto, Ontario*

- Built a full-stack grocery app with admin dashboards and customer storefront, digitizing a catalog of **500+** products and streamlining order management, payments, and checkout workflows
- Designed REST APIs and a relational data model in **ASP.NET C#** and **SQL Server**, applying constraints, transactions, and indexing to ensure reliable consistency of inventory, orders, and user data
- Reduced page load time by **30%** through SQL indexing, server-side pagination, and efficient caching

## PROJECTS

### FlyNext | *Next.js, Prisma, PostgreSQL, Supabase, Docker, Tailwind* 🚀

- Built a full-stack travel booking app with hotel & flight reservations and role-based access for users and owners
- Designed REST APIs and relational schema in **Node.js** and **PostgreSQL**, ensuring consistent data integrity
- Developed a responsive frontend with **Next.js** and **Tailwind CSS**, supporting search, filtering, cart, and checkout
- Integrated **JWT authentication** and secure session handling with cookies to protect user data
